

Jay Wu

Product Manager | Financial Products, KYC, Compliance & Payment Infrastructure

Email: dan40912@gmail.com | [LinkedIn Profile](#) | [Medium](#)

PROFILE

Product Manager with 10 years of experience delivering regulated financial products across trading platforms, KYC onboarding, payment infrastructure, compliance operations, and growth initiatives. Experienced in leading cross-functional projects involving engineering, compliance, operations, finance, and external vendors to launch scalable solutions that improve customer onboarding, payment success rates, operational efficiency, and regulatory compliance. Background includes CFD brokerage operations, trading platforms, payment integrations, regulatory reporting, CRM workflows, copy trading systems, and cross-border financial services across APAC markets.

KEY ACHIEVEMENTS

- Led payment infrastructure and integration initiatives across regulated financial platforms.
- Delivered KYC onboarding and compliance workflow improvements to streamline customer verification and operational processes.
- Supported regulatory reporting initiatives across multiple jurisdictions, including ASIC reporting requirements.
- Coordinated product delivery across engineering, compliance, operations, finance, and external vendor teams.
- Managed trading platform initiatives covering MT4, MT5, copy trading, payment infrastructure, and customer onboarding workflows.

PROFESSIONAL EXPERIENCE

Product Manager, Trading Platform Operations

Australian CFD Brokerage | Aug 2024 - Present | Taiwan

- Own product initiatives across trading platforms, KYC onboarding, payment infrastructure, CRM workflows, and regulatory operations supporting global brokerage services.
- Lead stablecoin payment integration projects and third-party payment provider onboarding, expanding global payment coverage and improving funding flexibility.
- Optimize KYC onboarding and payment workflows through collaboration with compliance, operations, and engineering teams, reducing manual processes and improving customer experience.
- Manage product coordination across MT4, MT5, proprietary trading platforms, payment systems, and customer onboarding journeys.
- Improve finance-focused website SEO performance by 3x, contributing to increased organic acquisition and customer growth.

SEO Program Manager

B2B Growth Systems | 2023 - 2024 | Cross-region

- Managed SEO programs for 20+ industrial brands across multiple regions.
- Established scalable content and technical SEO processes aligned with CRM and sales operations.
- Integrated SEO performance tracking with Zoho CRM, supporting lead generation and commercial outcomes.

Product Manager / System Integration PM

Custom POS & Information Systems | 2021 - 2023 | Taipei

- Led end-to-end system integration projects involving e-invoice platforms, payment gateways, POS systems, ERP systems, and third-party APIs.
- Defined business requirements, data mappings, migration rules, exception handling, and operational workflows.
- Delivered customer implementations, user training, launch support, and vendor coordination for multiple enterprise clients.

SELECTED PROJECTS

Trading Platform & Payment Infrastructure

Financial product infrastructure

Led cross-functional initiatives covering payment routing, stablecoin funding solutions, trading platform operations, and customer funding experiences.

- Coordinated platform improvements across MT4, MT5, proprietary systems, finance operations, and external payment providers.
- Improved funding flexibility through stablecoin rails and third-party payment provider onboarding.

Copy Trading Platform Operations

TradingCup platform operations

Supported copy trading platform growth, VIP signal-provider management, platform optimization, and issue-resolution initiatives.

- Improved operational stability and customer experience through systematic issue management and process improvements.
- Supported feature promotion and user-growth efforts for active copy traders.

Regulatory Reporting & Compliance

ASIC, Jordan, Spain, and France requirements

Supported regulatory reporting initiatives across Australia and international jurisdictions.

- Coordinated reporting requirements, trade data preparation, issue investigation, and stakeholder communication.
- Prepared report data for the in-house platform, MT4, and MT5.

KYC & Customer Onboarding Optimization

Compliance workflow and customer journey

Improved customer onboarding journeys through KYC workflow enhancements and operational process optimization.

- Worked closely with compliance, operations, support, and engineering teams to improve approval efficiency and customer conversion.
- Reduced manual coordination by clarifying checkpoints, ownership, and workflow rules.

Additional Product & Growth Projects

Wagas POS / CRM / online ordering and IoT channel expansion

Delivered adjacent system-integration and growth projects across CRM, POS, online ordering, IoT product launch, and APAC channel expansion.

- Built Wagas POS, CRM, and online ordering workflows, reducing customer-service calls by 10,000 per year and supporting 10K+ orders.
- Coordinated an IoT product launch across Shanghai, Kaohsiung, and Shenzhen; expanded channels including COSTCO, MOMO, Taobao, and Shanghai TV shopping.
